INSERT Agency/Agencies
INSERT Presenter

Trinity River Restoration Program
Adult Monitoring Evaluation Workshop
September 15-16, 2011
Arcata, CA

Project Title

Project Background

INSERT brief description on background/history of the project

Project Title

Project Objectives

INSERT project objectives, including linkages to the IAP objectives

How does this project support the Trinity River Restoration Program?

Explain how the information collected by this project supports the TRRP and specifically how the TRRP uses the information to evaluate the effectiveness of management actions or the effectiveness of the overall program.

Field Methods

1. sampling methods/protocols
2. areas surveyed
3. sampling frequency

Analytical methods

1. Data management, QA/QC procedures
2. Data analyses (estimation methods)
 - a. Estimators used
 - b. Precision of estimates (provide examples of previous data if available)
3. Assumptions used in the analyses and support for their validity (i.e.: direct testing of assumptions or other evidence that supports the validity of the assumptions)

Project Reporting

1. Reporting of information – in-season, preliminary reports, final reports
2. Data storage

Project Title

Issues/Challenges

Explain any issues/challenges that have occurred and how these influence the ability of the project to meet its objectives.
