

The Weaver Creek projects we have the opportunity to visit on Monday are shown here. Alex Cousins, Mark Lancaster and Sandra Perez will lead the morning tour. They have suggested we meet at the intersection of Hwy 299 with West Weaver Creek. I am asking Eric Peterson to provide a map with the locations of these project sites for us. Also attached are the 4 pre-proposals we have received so far. Remember these will help us to refine the proposal format.

This is our first year to use the pre-proposal approach, and I have just provided a standard template. We will want to refine it for TRRP use.

Please plan to be flexible and let the field trip be the focus on Monday. We can always schedule a teleconference if we do not make it through the entire agenda.

Please remember to dress appropriately (cool morning, warming up) and bring water.

1- West Weaver Creek

TCRCD, West Weaver Creek- Channel and Floodplain Rehabilitation 2014

2- USFS Weaverville Ranger District

NWRC&D (5C), Sidney Gulch USFS Compound Site Feasibility Study- 2012
