September 16, 2015

Seth Naman, Chair
Trinity Management Council
c/o Trinity River Restoration Program
P.O. Box 1300
Weaverville, CA 96093

Dear Mr. Naman:

The Trinity Adaptive Management Working Group (TAMWG) met on September 16, 2015. This letter serves to provide you with a summary of that meeting and our resulting recommendations, as required by TAMWG's bylaws.

We appreciated your Trinity Management Council (TMC) update as well as the Executive Director report. The TAMWG continues to have significant concerns with your desire to hold closed executive sessions. We are supportive of the TMC's development of a Trinity River Restoration Program (TRRP) Efficiencies Subcommittee and unanimously **recommend that the Subcommittee include the TAMWG Chair and participation by the public.**

We received an update on the 2015 water year, as well as an informative presentation on how Klamath Chinook Salmon run projections are developed and used as a trigger mechanism for supplemental fall flows. We have deferred our discussion on TRRP goals and objectives until our December meeting so that more members can be present and we have an opportunity to review additional background documentation.

Our next meeting has been tentatively set for December 10-11. Please contact me with any questions.

Sincerely,

Elizabeth Hadley, Chair
Trinity Adaptive Management Working Group
