As part of the Trinity River Restoration Program (TRRP) channel rehabilitation activities to improve habitat, the U.S. Bureau of Reclamation and the U.S. Bureau of Land Management (federal co-lead agencies), and the North Coast Regional Water Quality Control Board (Regional Water Board - State lead agency), invite you to a public meeting to learn about proposed 2017 construction at the Deep Gulch and Sheridan Creek Channel Rehabilitation sites and to provide your input. **The public meeting will be held Wednesday March 15, 2017 at the North Fork Grange in Junction City, CA from 6:00 to 8:00pm. Project information will be presented, technical staff will be available to discuss the project, answer questions, and request public comment.**

The Deep Gulch and Sheridan Creek project sites encompass 177 acres, including 138 acres of BLM-managed land and 39 acres of private land. The TRRP proposes to construct the projects in summer 2017 to increase salmon and steelhead habitat downstream of Lewiston Dam, as authorized in the December 19, 2000, Record of Decision for the Trinity River Mainstem Fishery Restoration Environmental Impact Statement. The proposed project is planned to enhance both terrestrial and aquatic habitat quality that has been severely degraded.

The Draft environmental document that formally analyzes the impacts of these projects and which meets California Environmental Quality Act (CEQA) and National Environmental Policy Act (NEPA) requirements will be available March 8, 2017 at www.trrp.net, and on the U.S. Bureau of Reclamation's website: http://www.usbr.gov/mp/nepa/nepa_base.cfm?location=ncao for public review and comment. The public comment period will extend from the date of posting through April 7, 2017. Hard copies will be available for review at the TRRP office (by Tops Grocery) and at the Trinity County Library.
